

Our Syndromes

- A. ORTHOPNEA
- B. KIDNEY FAILURE
- C. HYPERTENSION

We can start with the one what we think will be more practical or broader. Because the key symptom was dyspnea and orthopnea let's start over there.

Prioritized Differential Diagnosis: Orthopnea

TIER / NIVEL	Clinical entity
I	1) Hypertensive crisis 2) Kidney failure (renal sclerosis or drugs)
Ib	1) Pulmonary embolus 2) Myocardial infarction
II	1) Pulmonary infection 2) Pulmonary toxicity (drugs)
III	Pulmonary hemorrhage, Pericardial disease, intracardiac tumor or thrombus, ..
